# A new look, but as charming as ever: the side operation HANSAVANTIS STYLE.

HANSAVANTIS STYLE it just has that special something: Its clear geometrical shape is perfectly rounded off by the slightly sweeping fitting.

Practical and aesthetical, the HANSAVANTIS STYLE is now also available as a convincing side-operation version, ideal for use anywhere in the kitchen or bathroom. A striking feature of the new design is the shape of the cylinder, which – similar to a cone – expands towards the bottom.

A contemporary, visual innovation, which only enhances the elegance of the fitting.

The tried-and-tested spout has shown itself to be particularly

handy in the kitchen. In the bathroom, it fits in perfectly with counter-mounted basins.

The standard HANSAECO 3.5 control cartridge installation with its hot-water stop and ceramic discs enable water to flow smoothly and reliably. Positive side effect: You can cut your water and energy consumption levels by up to 50%. To ensure that you enjoy the HANSAVANTIS STYLE with its sensational technology for as long as possible, it comes with a body made of the best brass alloy MS63 which will endure many years of service. Thanks to its upright shape, the fitting is easy to clean and maintain.

#### Single-lever basin mixer

##### Side-operated

5254 2207, chrome,  
swiveling spout,  
with pop-up waste
